Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Mrs. Baumgardner discussed the merits of the invention. In particular, she explained that applicants invention is based on changing the "braking characteristics" of the lens which means the predetermined/factory stops in the lens design is changed by an input from the lens or user. Mrs. Baumgardner believes Kaneko, the art of record, doesn't enable changing of the braking characteristics. The Examiner contends Kaneko does change the braking characteristics when changing between the different zoomings. However, upon filing a response to the non final action, the Examiner will consider Mrs. Baumgardner discussion of the invention as it relates to changing of the "braking characteristics".
